

## Registered Nurses In Private Practice and Nursing Agencies 2006

| <b>NATIONAL REFERENCE PRICE LIST FOR SERVICES BY REGISTERED NURSES IN PRIVATE PRACTICE AND NURSING AGENCIES, EFFECTIVE FROM 1 JANUARY 2006</b>  |   |       |
|---|---|-------|
| <p>The following reference price list is not a set of tariffs that must be applied by medical schemes and/or providers. It is rather intended to serve as a baseline against which medical schemes can individually determine benefit levels and health service providers can individually determine fees charged to patients. Medical schemes may, for example, determine in their rules that their benefit in respect of a particular health service is equivalent to a specified percentage of the national health reference price list. It is especially intended to serve as a basis for negotiation between individual funders and individual health care providers with a view to facilitating agreements which will minimise balance billing against members of medical schemes. Should individual medical schemes wish to determine benefit structures, and individual providers determine fee structures, on some other basis without reference to this list, they may do so as well.</p> <p>In calculating the prices in this schedule, the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated, e.g. when applying a modifier, the same rounding scheme should be followed.</p> <p>VAT EXCLUSIVE PRICES APPEAR IN BRACKETS.</p>   |   |       |
